As a valued customer of North American Company of Life and Health Insurance, We want to make sure You understand the unique features of the indexed life insurance policy for which You have applied. The policy may earn interest based on the movement of the selected Index(es), but will never credit less than zero percent. While earnings are based on the Index(es) You select, premiums are not invested in stocks, bonds or equity investments, and the Index growth does not include dividends.

The policy for which you have applied is not registered as a security. Therefore, purchasing this indexed life insurance policy is not the same as making an investment directly in the stock market. This summary is not intended to be a full description of the policy. Please refer to your policy when issued for complete details and definitions.

ALLOCATION CHOICES

You may direct Your money among the Fixed Account and/or any combination of the following Indices:

1. The Standard & Poor's 500[®] Composite Stock Price Index (S&P 500[®])
2. The Dow Jones Industrial AverageSM (DJIASM) Composite Stock Price Index
3. The Nasdaq-100[®] Stock Price Index
4. The S&P MidCap 400[®]
5. The Russell 2000[®]
6. The Dow Jones EURO STOXX 50[®]
7. Uncapped S&P 500[®]
8. Multi-Index Group

INDEX CREDITING METHODS

The earnings credited to the selected Index(es) are calculated through the use of either the Daily Averaging method, the Annual Point-to-Point method, the Monthly Point-to-Point method. No Index Credits will be applied until the end of the Index Period and money withdrawn or surrendered prior to this time will not receive Index Credits.

- When the **Daily Averaging** method is chosen, the Index change is determined by calculating the difference between the Index Value on the first day of the Index Period and the average Index Value throughout the Index Period. The Index change is subject to the Index Participation Rate, Index Cap Rate, and Index Floor Rate. The Index Credit, if any, is credited and locked in at the end of the Index Period. The Daily Averaging crediting method is available for the S&P 500[®], S&P MidCap 400[®], Russell 2000[®] and DJIASM.
- When the **Annual Point-to-Point** method is chosen, the Index credit is determined by calculating the change between the Index Value on the first day of the Index Period and last day of the Index Period. The Index growth is subject to the Index Cap Rate and any earnings are credited and locked in at the end of the 12 month Index Period. The rate credited will never be less than zero percent. The Annual Point-to-Point crediting method is available for the S&P 500[®], S&P MidCap 400[®], Russell 2000[®], DJIASM, Dow Jones EURO STOXX 50[®], and NASDAQ-100[®].
- When the **Monthly Point-to-Point** method is chosen, the Index credit is determined by calculating the 12 Monthly Index Returns which are determined by the change in the Index during the month. The Monthly Index Return can not be greater than the Monthly Cap Rate and it can be a negative number. At the end of the 12 month Index Period, the 12 preceding Monthly Index Returns are added together to determine the Index Credit which is credited and locked in. The rate credited at the end of the Index Segment will never be less than zero percent, and will never be greater than 12 times the Monthly Cap Rate. The Monthly Point to Point crediting method is available for the S&P 500[®].

Copy 1 - Administrative Office, Copy 2 - Applicant, Copy 3 – Agent

- When the **Multi-Index Annual Point-to-Point** method is chosen, the Index credit is determined by calculating a Multi-Index change between the first day of the Index Period and the last day of the Index Period. The Multi-Index change uses the following three indices – S&P 500[®], Dow Jones EURO STOXX 50[®] and Russell 2000[®]. The annual point-to-point Index growth from each of the three individual indices derives the Multi-Index change. 50% of the best performing Index growth plus 30% of the second best performing Index growth plus 20% of the third best performing Index growth equals the Multi-Index change. The Multi-Index change is subject to the Index Cap Rate and any earning are credited and locked in at the end of the 12 month Index Period. The rate credited will never be less than zero percent.

IMPORTANT POLICY TERMS YOU SHOULD KNOW

Illinois Life Insurance Buyer's Guide

This guide can show you how to save money when you shop for life insurance. It helps you to:

- Decide how much life insurance you should buy,
- Decide what kind of life insurance policy you need, and
- Compare the relative cost of similar life insurance policies.

This guide has been prepared by the Illinois Department of Insurance, in part using materials developed by National Association of Insurance Commissioners.

The National Association of Insurance Commissioners is an association of state insurance regulatory officials. This association helps the various State Insurance Departments to coordinate insurance laws for the benefit of all consumers. You are urged to use this Guide in making a life insurance purchase.

THIS GUIDE DOES NOT ENDORSE ANY COMPANY OR POLICY

BUYING LIFE INSURANCE

When you buy life insurance, you want a policy which fits your needs without costing too much. Your first step is to decide how much you need, how much you can afford to pay and the kind of policy you want. Then, find out what various companies charge for that kind of policy. You can find important differences in the cost of life insurance by using the life insurance cost indexes which are described in this Guide. A good life insurance agent or company will be able and willing to help you with each of these shopping steps.

If you are going to make a good choice when you buy life insurance, you need to understand which kinds are available. If one kind does not seem to fit your needs, ask about the other kinds which are described in this Guide. If you feel that you need more information than is given here, you may want to check with a life insurance agent or company or books on life insurance in your public library. Life insurance can be bought either on an individual basis or on a group basis. Group insurance may be inexpensive when compared to individual insurance. It is important to remember that insurance purchased on this basis is usually term insurance, and hence will not develop cash values, and is dependent on your continued membership in the group or employment. Also, the amount of insurance that is available for purchase is usually limited.

CHOOSING THE AMOUNT

One way to decide how much life insurance you need is to figure how much cash and income your dependents would need if you were to die. Life insurance can provide cash for last expenses, and income for your family's future living expenses. Your insurance should come as close as you can afford to make up the difference between (1) what your dependents would have if you were to die now, and (2) what they would actually need at some time in the future when needs change.

CHOOSING THE RIGHT KIND

All life insurance policies agree to pay an amount of money if you die. But all policies are not the same. There are three basic kinds of life insurance:

1. TERM INSURANCE
2. WHOLE LIFE INSURANCE
3. ENDOWMENT INSURANCE

The kind of life insurance you purchase is dependent on the need you are trying to satisfy. Some needs are temporary, i.e. do not exist throughout your life, while other needs are permanent. As an example, the need to finance your children's education is a temporary need. The need to meet mortgage payments is also a temporary need since it exists only while the mortgage exists. On the other hand, the financial needs of your family after your death is a permanent need.

Remember, no matter how fancy the policy title or sales presentation might appear, all life insurance policies contain one or more of the three basic kinds. If you are confused about a policy that sounds complicated, ask the agent if it combines more than one kind of life insurance. The following is a brief description of the three basic kinds:

Term Insurance

Term insurance is death protection for a "term" of one or more years. Death benefits will be paid only if you die within that term of years. Term insurance generally provides the largest immediate death protection for your premium dollar.

Some term insurance policies are "renewable" for one or more additional terms even if your health has changed. Each time you renew the policy for a new term, premiums will be higher. You should check the premiums at older ages and the length of time the policy can be continued.

Some term insurance policies are also "convertible." This means that before the end of the conversion period, you may trade the term policy for a whole life or endowment insurance policy even if you are not in good health. Premiums for the new policy will be higher than you have been paying for the term insurance.

Whole Life Insurance

Whole life insurance gives death protection for as long as you live. The most common type is called "straight life" or "ordinary life" insurance, for which you pay the same premiums for as long as you live. These premiums can be several times higher than you would pay initially for the same amount of term insurance. But they are smaller than the premiums you would eventually pay if you were to keep renewing a term insurance policy until your later years.

Some whole life policies let you pay premiums for a shorter period such as 20 years, or until age 65. Premiums for these policies are higher than for ordinary life insurance since the premium payments are squeezed into a shorter period.

Although you pay higher premiums, to begin with, for whole life insurance than for term insurance, whole life insurance policies develop "cash values" which you may have if you stop paying premiums. You can generally either take the cash, or use it to buy some continuing insurance protection. Technically speaking, these values are called "nonforfeiture benefits." This refers to benefits you do not lose (or "forfeit") when you stop paying premiums. The amount of these benefits depends on the kind of policy you have, its size, and how long you have owned it.

A policy with cash values may also be used as collateral for a loan. If you borrow from the life insurance company, the rate of interest is shown in your policy. Any money which you owe on a policy loan would be deducted from the benefits if you were to die, or from the cash value if you were to stop paying premiums.

Endowment Insurance

An endowment insurance policy pays a sum or income to you – the policyholder -- if you live to a certain age. If you were to die before then, the death benefit would be paid to your beneficiary. Premiums and cash values for endowment insurance are higher than for the same amount of whole life insurance. Thus endowment insurance gives you the least amount of death protection for your premium dollar.

FINDING OUT A LOW COST POLICY

After you have decided which kind of life insurance fits your needs, look for a good buy. YOUR CHANCES OF FINDING A GOOD BUY ARE BETTER IF YOU USE TWO TYPES OF INDEX NUMBERS THAT HAVE BEEN DEVELOPED TO AID IN SHOPPING FOR LIFE INSURANCE. One is called the "Surrender Cost Index" and the other is the "Net Payment Cost Index." It will be worth your time to try to understand how these indexes are used, but in any event, use them ONLY for comparing the relative costs of similar policies. LOOK FOR POLICIES WITH LOW COST INDEX NUMBERS.

WHAT IS COST?

"Cost" is the difference between what you pay and what you get back. If you pay a premium for life insurance and get nothing back, your cost for the death protection is the premium. If you pay a premium and get something back later on, such as a cash value, your cost is smaller than the premium.

The cost of some policies can also be reduced by dividends; these are called "participating" policies. Companies may tell you what their current dividends are, but the size of future dividends is unknown today and cannot be guaranteed. Dividends actually paid are set each year by the company.

Some policies do not pay dividends. These are called "guaranteed cost" or "non-participating" policies. Every feature of a guaranteed cost policy is fixed so that you know in advance what your future cost will be.

The premiums and cash values of a participating policy are guaranteed, but the dividends are not. Premiums for participating policies are typically higher than for guaranteed cost policies, but the cost to you may be higher or lower, depending on the dividends actually paid.

WHAT ARE COST INDEXES?

In order to compare the cost of policies, you need to look at:

1. Premiums
2. Cash Values
3. Dividends

Cost indexes use one or more of these factors to give you a convenient way to compare relative costs of similar policies. When you compare costs, an adjustment must be made to take into account that money is paid and received at different times. It is not enough to just add up the premiums you will pay and to subtract the cash values and dividends you expect to get back. These indexes take care of the arithmetic for you. Instead of having to add, subtract, multiply and divide many numbers yourself, you just compare the index numbers which you can get from life insurance agents and companies:

1. LIFE INSURANCE SURRENDER COST INDEX

This index is useful if you consider the level of the cash values to be of primary importance to you. It helps you compare costs if at some future point in time, such as 10 or 20 years, you were to surrender the policy and take its cash value.

2. LIFE INSURANCE NET PAYMENT COST INDEX

This index is useful if your main concern is the benefits that are to be paid at your death and if the level of cash values is of secondary importance to you. It helps you compare costs at some future point in time, such as 10 or 20 years, if you continue paying premiums on your policy and do not take its cash value.

There is another number called the Equivalent Level Annual Dividend. It shows the part dividends play in determining the cost index of a participating policy. Adding a policy's Equivalent Level Annual Dividend to its cost index allows you to compare total costs of similar policies before deducting dividends. However, if you make any cost comparisons of a participating policy with a non-participating policy, remember that the total cost of the participating policy will be reduced by dividends, but the cost of the non-participating policy will not change.

HOW DO I USE COST INDEXES?

The most important thing to remember when using cost indexes is that a policy with a small index number is generally a better buy than a comparable policy with a larger index number. The following rules are also important:

- (1) Cost comparisons should only be made between similar plans of life insurance. Similar plans are those which provide essentially the same basic benefits and require premium payments for approximately the same period of time. The closer

policies are to being identical, the more reliable the cost comparison will be.

- (2) Compare index numbers only for the kind of policy, for your age and for the amount you intend to buy. Since no one company offers the lowest cost for all types of insurance at all ages and for all amounts of insurance, it is important that you get the indexes for the actual policy, age and amount which you intend to buy. Just because a "Shopper's Guide" tells you that one company's policy is a good buy for a particular age and amount, you should not assume that all of that company's policies are equally good buys.
- (3) Small differences in index numbers could be offset by other policy features, or differences in the quality of service you may expect from the company or its agent. Therefore, when you find small differences in cost indexes, your choice should be based on something other than cost.
- (4) In any event, you will need other information on which to base your purchase decision. BE SURE YOU CAN AFFORD THE PREMIUMS, AND THAT YOU UNDERSTAND ITS CASH VALUES, DIVIDENDS AND DEATH BENEFITS. You should also make a judgment on how well the life insurance company or agent will provide service in the future, to you as a policyholder.
- (5) These life insurance cost indexes apply to new policies and should not be used to determine whether you should drop a policy you have already owned for awhile, in favor of a new one. If such a replacement is suggested, you should ask for information from the company which issued the old policy before you take action.
- (6) An important fact to note is the difference in premium payments paid during one year's time based on an annual premium versus the annualized periodic premium. For example, if you choose to pay premiums on a monthly basis, the annualized periodic premium would be twelve (12) times the monthly premium. There may be a significant difference between the annualized periodic premium and the annual premium and it should be considered when deciding on a payment schedule.

IMPORTANT THINGS TO REMEMBER -A SUMMARY -

The first decision you must make when buying a life insurance policy is choosing a policy whose benefits and premiums most closely meet your needs and ability to pay. Next, find a policy which is also a relatively good buy. If you compare Surrender Cost Indexes and Net Payment Cost Indexes of similar competing policies, your chances of finding a relatively good buy will be better than if you do not shop. REMEMBER, LOOK FOR POLICIES WITH LOWER COST INDEX NUMBERS. A good life insurance agent can help you to choose the amount of life insurance and kind of policy you want and will give you cost indexes so that you make cost comparisons of similar policies.

DON'T BUY LIFE INSURANCE UNLESS YOU INTEND TO STICK WITH IT. A policy which is a good buy when held for 20 years can be very costly if you quit during the early years of the policy. If you surrender such a policy during the first few years, you may get little or nothing back and much of your premium may have been used for company expenses.

Read your new policy carefully, and ask the agent or company for an explanation of anything you do not understand. Whatever you decide now, it is important to review your life insurance program every few years to keep up with changes in your income and responsibilities.

NOTICE REGARDING REPLACEMENT OF LIFE INSURANCE OR ANNUITY

REPLACING YOUR LIFE INSURANCE POLICY OR ANNUITY?

Are you thinking about buying a new life insurance policy or annuity and discontinuing or changing an existing one? If you are, your decision could be a good one - or a mistake. You will not know for sure unless you make a careful comparison of your existing benefits and the proposed benefits.

Make sure you understand the facts. You should ask the company or insurance producer that sold you your existing policy to give you information about it.

Hear both sides before you decide. That way you can be sure you are making a decision that is in your best interest.

We are required by law to notify your existing company that you may be replacing their policy.

List below the identification of policies which are involved in the replacement transaction.
